

PCL 4040 NOVOC® Compliant Universal Solvent is now Certified by S.C.A.Q.M.D. as a Clean Air Solvent!

PCL 4040 NOVOC® Compliant Universal Solvent has been CERTIFIED by the South Coast Air Quality Management District (SCAQMD) as a Clean Air Solvent! The SCAQMD definition of a Clean Air Solvent (CAS) is CLEAN AIR SOLVENT is a VOC-containing material used to perform solvent cleaning, solvent finishing, or surface preparation operations or activities which:

- Contains no more than twenty-five (25) grams of VOC per liter of material, as applied;
- Has a VOC composite partial vapor pressure less than 5 mm Hg at 20°C (68°F);
- Reacts to form ozone at a rate not exceeding that of toluene;
- Contains no compounds classified as Hazardous Air Pollutants (HAPs) by the Federal Clean Air Act, or Ozone Depleting Compounds (ODCs) and Global Warming Compounds (GWCs) as defined by the District; and
- Has been certified by the District to meet the criteria stated in (A) through (D) according to test methods and procedures approved by the District.

In addition to the air quality benefits resulting from the use of CAS, the user benefits include an exemption from record keeping and emission fees (CAS products only). The user will need to keep records of their annual purchases of the CAS solvent.

PCL 4040 NOVOC® Compliant Universal Solvent is an excellent product for

- Thinning of coatings
- Surface cleaning and preparation
- Paint equipment cleaning
- Repair & maintenance cleaning
- Adhesive application equipment cleaning

PCL 4040 NOVOC® Compliant Universal Solvent is available in Gallons, Fives and Drums.

Be a part of the solution - clean up the air!
